NURSING
1964-1965

CORNELL UNIVERSITY-NEW YORK HOSPITAL
SCHOOL OF NURSING

SCHOOL OF NURSING

TERM DATES, 1964-1965

Class of 1965

September 14, 1964—January 24, 1965

February 1, 1965—June 9, 1965

Class of 1966

September 14, 1964—January 31, 1965

February 8, 1965—June 20, 1965

September 13, 1965—January 23, 1966

Class of 1967

September 21, 1964—January 24, 1965

February 1, 1965—May 30, 1965

May 31, 1965—June 27, 1965 (Intersession)

September 13, 1965—January 30, 1966

CORNELL UNIVERSITY ANNOUNCEMENTS. Volume 56. Number 3. Aug. 3, 1964. Published twenty-one times a year: twice in March, April, May, June, July, August, October, and December; three times in September; once in January and in November; no issues in February. Published by Cornell University at Edmund Ezra Day Hall, 18 East Avenue, Ithaca, New York. Second-class postage paid at Ithaca, New York.

CALENDAR (Tentative)

1964

Sept. 12	<i>Saturday</i>	Registration, new students
Sept. 14	<i>Monday</i>	Freshman Orientation, Class of 1967
Sept. 14	<i>Monday</i>	Instruction begins for Classes of 1965, 1966
Sept. 21	<i>Monday</i>	Instruction begins for Class of 1967
Nov. 26	<i>Thursday</i>	Thanksgiving recess
Nov. 30	<i>Monday</i>	Instruction resumed
Dec. 19	<i>Saturday</i>	Christmas recess

1965

Jan. 4	<i>Monday</i>	Instruction resumed
Jan. 25	<i>Monday</i>	Midyear recess, Classes of 1965, 1967
Feb. 1	<i>Monday</i>	Midyear recess, Class of 1966
Feb. 1	<i>Monday</i>	Instruction resumed, Classes of 1965, 1967
Feb. 8	<i>Monday</i>	Instruction resumed, Class of 1966
April 5	<i>Monday</i>	Spring recess, Class of 1965
April 12	<i>Monday</i>	Spring recess, Classes of 1966, 1967
April 12	<i>Monday</i>	Instruction resumed, Class of 1965
April 19	<i>Monday</i>	Instruction resumed, Classes of 1966, 1967
May 31	<i>Monday</i>	Holiday: Memorial Day
June 1	<i>Tuesday</i>	Interession begins for Class of 1967
June 9	<i>Wednesday</i>	Commencement Day
June 21	<i>Monday</i>	Summer vacation begins for Class of 1966
June 28	<i>Monday</i>	Summer vacation begins for Class of 1967

Students are expected to remain in School until the last scheduled class or laboratory experience is completed prior to any vacation period. At the close of the vacation period, each student is expected to return to the School in time to participate in the first scheduled class or laboratory experience.

The New York Hospital-Cornell Medical Center, at 68th Street and the East River, covers three city blocks (68th to 71st Streets), and includes The New York Hospital, the Cornell Medical College, and the Cornell University-New York Hospital School of Nursing.

THE PREPARATION OF TODAY'S PROFESSIONAL NURSE

NURSING represents one of the vital forces for health in today's society. The nursing needs of people range from the simplest to the most complex. Persons with widely varying preparation may help to meet these needs, but the professional nurse is the key person in the total picture of nursing service. Nursing service includes promotion of health, prevention of disease, and treatment of sickness; it should reach individuals in the hospital, the home, the school, and on the job.

The professional nurse who is to function in the pivotal position in this total service must have a preparation which is different from that offered by the majority of nursing schools. The rapid increase in scientific knowledge and the broadened scope of therapy alone would make this essential. Added to this are the special problems growing out of the wider spectrum of ages to be cared for, since modern medicine provides greater health opportunities for the newborn and the aged. The present concept of rehabilitation, which accepts as an aim optimum recovery for each person, demands from the nurse factual knowledge based on the various sciences, trained insight to recognize possibilities, and skill in interpreting this information to her patient.

Continuing research in the behavioral sciences (e.g., sociology, cultural anthropology, and social psychology) points the way to another field in which the nurse must be prepared. These sciences offer resources essential in helping her work effectively not only with patients but with professional practitioners in related fields, and with less well-prepared assistants whom she must guide in nursing care. This responsibility of teaching and directing auxiliary personnel is inherent in the work of every professional nurse today, though unknown only a few years ago.

The purpose of the program in this School is to give each graduate educational preparation for a happy and effective life, personally and professionally. Immediately upon graduation she is prepared to practice, under guidance, in any beginning position in professional nursing, and with increased experience can help to meet one of today's greatest health problems, that of finding new and better ways of providing nursing care for a rapidly expanding population. For those students with superior academic potential the curriculum assures a basis for further study leading to advanced degrees, which are essential for wider responsibilities in such fields as teaching, administration, and nursing research.

HISTORY OF THE SCHOOL

The Cornell University-New York Hospital School of Nursing was established as a school in Cornell University in 1942, on the sixty-fifth anniversary of the founding of The New York Hospital School of Nursing, one of the earliest nursing schools in the country. The School is part of The New York Hospital-Cornell Medical Center, which includes also the Cornell University Medical College and the various adjoining buildings of The New York Hospital extending from 68th to 71st Streets on the East River.

The Center is a joint undertaking of The Society of the New York Hospital and Cornell University, committed to a fourfold purpose in (1) care of the sick, providing the same wisdom and skill to rich and poor; (2) education of doctors and nurses, research workers, technicians, and others who will work in the field of medical science; (3) research to extend the boundaries of knowledge in the health fields; and (4) promotion of public health through the development of preventive medicine.

The New York Hospital is the second oldest voluntary hospital in this country, its Royal Charter having been granted in 1771, in the reign of King George III. The first patients were soldiers wounded in the Revolutionary War. At that time the Hospital was located on the lower end of Manhattan, the only part of the city then settled, and on early maps the location was designated simply as "the Hospital."

Cornell University with its campus in Ithaca, New York, received its charter in 1865.

Three circumstances contributed to the founding of the University in the eventful years that marked the close of the Civil War. In the first place, Ezra Cornell, a citizen of Ithaca, had come into a large fortune from his holdings in the newly formed Western Union Telegraph Company and had devoted a great deal of thought to the good that might be done by giving his wealth to education. A second circumstance was the fact that the State of New York had received a substantial land grant, under the Morrill Act of 1862, for the support of colleges teaching agriculture and the mechanical arts. The third circumstance was that Mr. Cornell had as a colleague in the state legislature of 1864-1865 a young senator named Andrew D. White, later to become the first president of the University, who had the vision of preserving the state's land grant intact for a single great institution which should teach not only agriculture and the mechanical arts but the humanities and the sciences as well.

The Medical College and the School of Nursing are the two divisions of the University which are located in New York City.

The Hospital had been operating for over 100 years before a school for the training of nurses was opened. There had been early steps taken, however, to improve the care given to patients; even in 1799 Dr. Valentine Seaman, a scholar and prominent physician, had organized a series of lectures combined with a course of practical instruction in the wards which was given to the women who were

engaged by the Hospital at that time as "watchers" and "nurses." Although the theoretical content was meager and the practical instruction not systematically planned, these classes focused attention on the fact that women who had some preparation for their work gave better care than those without instruction. When in 1873 the first training school in this country on the Nightingale pattern was opened at Bellevue Hospital, the Governors of The Society of the New York Hospital contributed to its support. Four years later, in 1877, when the Hospital moved to new buildings, The New York Hospital Training School for Nurses was opened in quarters which were considered to have all the modern improvements of the times. The School moved to the present location when the present Medical Center was opened in 1932.

Early in the Hospital's history it pioneered in such steps as introducing temperature charts and anesthetics, in the use of vaccination for smallpox, and in humane methods in the care of the mentally ill. Today the Center continues to pioneer in the improvement of patient care. In today's pioneering, a significant factor is the quality of the nursing which must keep abreast with developments in the biological, physical, and social sciences. New methods (such as open heart surgery, and use of the artificial kidney) and new approaches (such as family-centered maternity care and helping the mother of a hospitalized child to play a greater part in the child's care) are examples of changes which require new methods in nursing as well.

The health needs of the community and country have been the guiding force in the development of the School, which has modified its program to keep pace with these needs. Today the work of the professional nurse requires a great deal more self-direction and leadership ability than in the past and in recognition of this, the University program was established in 1942. Since 1946, all students admitted to the School have been candidates for the degree of Bachelor of Science in Nursing. An endowment fund for the School was begun in 1951, which, as it grows, will further safeguard the progress of the School for future development.

THE ALUMNAE ASSOCIATION

The Cornell University-New York Hospital School of Nursing Alumnae Association, originally the Alumnae Association of The New York Hospital School of Nursing, was organized in 1893. It was one of the ten alumnae associations which helped to bring about the national professional organization of nurses, now known as the American Nurses' Association. In 1945 the Alumnae Association became a part of the Cornell University Alumni Association.

ACCREDITATION

The School is approved for accreditation by the Department of Baccalaureate and Higher Degree Programs of the National League for Nursing as a generic college program leading to a baccalaureate degree, and preparing for beginning public health nursing responsibilities. The accreditation is an important factor in the employment status of graduates of the School not only for positions which are specifically in public health but for others as well, since accreditation is on the basis of the total program.

ADMISSION

GENERAL STATEMENT OF REQUIREMENTS

NURSING requires individuals of integrity and intelligence with a deep interest in public service. Candidates are selected whose credentials indicate high rank in health, scholarship, maturity, and ability to work with people, and who give evidence of personal fitness for nursing. A minimum of two years of college (60 semester hours *) is required for admission.

SELECTION OF A COLLEGE FOR THE FIRST TWO YEARS

To meet the requirements for admission of two years of college, a wide choice of colleges is available. The required curriculum for these two years is general liberal arts, and it may be taken in any university, college, or junior college accredited by one of the regional associations of colleges and secondary schools. Applicants may therefore take the first two years at any one of a great many colleges throughout the country or in one of the colleges of Cornell University in Ithaca, New York. The work of the first two years required for admission to this School contains no nursing or "pre-nursing" courses, and, therefore, selection of a college in which to take the first two years is *not* dependent upon its offering a pre-nursing program.

Help in the selection of a college may be obtained by referring to the list, "Students in the School," which appears at the back of this Announcement. That list indicates the colleges from which students now in the School of Nursing have transferred. It is, however, not a complete list of the colleges from which students may transfer.

In selecting a college and registering for the courses of the first two years, the following section, "Educational Requirements for Admission," should be read carefully.

EDUCATIONAL REQUIREMENTS FOR ADMISSION

Within the two-year liberal arts college program taken prior to admission the following courses are *required*:

<i>Courses</i>	<i>Semester Hours Credit</i>
CHEMISTRY (including laboratory)	6 (2 semesters)
BIOLOGY or ZOOLOGY (including laboratory)	6 (2 semesters)
PSYCHOLOGY (general or introductory)	3 (1 semester)

Applicants entering with only 60 credits are urged NOT to take additional courses in the natural sciences, and the following courses are NOT acceptable as fulfilling the 6-hour credit requirements in the biological sciences: HUMAN ANATOMY, PHYSIOLOGY and BACTERIOLOGY.

* See the section "Educational Requirements for Admission."

Subjects for which there is no specific credit requirement but which are especially helpful to the nursing student are *recommended* in the following order of preference:

SOCIOLOGY OF CULTURAL ANTHROPOLOGY (urged)

ENGLISH, LITERATURE, HISTORY (urged)

Subjects in the general area of human behavior and relations

LANGUAGES (may be of particular usefulness in working with patients and also because of the many opportunities in international work and in advanced study)

ECONOMICS, PHYSICS

ART and MUSIC (theory, appreciation, or history)

Additional courses in the natural sciences (for students taking more than 60 credits prior to admission)

The following subjects *cannot be counted* toward the 60 semester hours of credit required for admission:

HEALTH and HYGIENE

MUSIC (instrumental or voice)

NURSING courses (any description) and NUTRITION

Generally, the principle applies that courses which cover essentially the same content as those presented in the School of Nursing cannot be credited toward meeting admission requirements because there is no allowance within the School of Nursing program for electives which can be substituted for courses already taken.

PHYSICAL EDUCATION

ONE-CREDIT courses are not accepted unless they are taken for two consecutive semesters totaling 2 credits.

The program in the School of Nursing requires the student to have a good background in English composition, communication skills, and use of the library. Should a student prove markedly deficient in communication skills she may be required to strengthen her background by taking courses at a near-by university.

Students on the Cornell University campus in Ithaca should confer early with their advisers in the colleges where they are registered, or with the University Placement Service staff, who will be glad to assist in planning a desirable program. Cornell students, as well as students in other colleges and universities, should, however, communicate with the School of Nursing as indicated in the section "Application for Admission." Each time the student registers for courses during her first two years, she should review this section of this Announcement with her adviser. Applicants who do not meet in full the specific subject requirements for admission, but who have a good record of two or more years of college, are encouraged to communicate with the School of Nursing for review of their credits and for possible assistance in arranging for courses which can be taken in summer sessions.

AGE AND HEALTH REQUIREMENTS

As each applicant is considered in the light of her total qualifications, there are no definite age limits. In general, however, it has proved desirable for applicants to be between the ages of 18 and 35 years. The results of a complete physical examination as well as those of a dental examination must be submitted at the time of application. Vaccination against poliomyelitis before admission is

strongly urged. Inoculation against tetanus and typhoid fever, and vaccination against smallpox, are *required* of all students. In addition the applicant must have a Schick Test, and, if the reaction is positive, must be immunized against diphtheria before admission.

APPLICATION FOR ADMISSION

A blank for formal application for admission to the School of Nursing, containing full instructions, may be obtained by returning the form at the back of this Announcement to the Registrar of the Cornell University-New York Hospital School of Nursing, 1320 York Avenue, New York, N.Y. 10021. Applicants for admission should include with their application the application fee. As one measure of suitability for nursing, certain psychometric tests are required before admission; the applicant is asked to meet the charge of \$10 for them.

A personal interview is considered an important part of the application procedure. Effort is made to have the applicant meet with a member of the Committee on Admissions at the School in New York. If this is not practicable, a conference can often be arranged with an alumna or other qualified person living near the applicant's home or college.

It is desirable that prospective applicants write or come to the School as early as possible so that they may receive assistance in planning their programs in high school and college to gain the best possible educational background preparatory to entering the School of Nursing.

Applications will be accepted as long as there are vacancies in the entering class. To be assured consideration, however, formal application should be made after the first term of the first college year if the applicant plans to enter after her second college year. When all application forms are received, including the report of the psychometric test and a transcript covering the first year of college work, and if these appear to be satisfactory, *the applicant will be accepted and a place in the class held for her pending completion of the remaining requirements with satisfactory standing.*

A candidate for admission must make a deposit of \$25 upon notification of this acceptance to the School. The full amount is credited toward the graduation fee. The deposit is not refundable if the applicant does not register.

PROMOTION AND GRADUATION

The established system of grading is a scale of F to A, with D as the lowest passing grade. An average of C for each term is required for promotion without condition. A grade below C in theory or practice in any clinical field of nursing or a term average which is less than C places a student on condition. This must be removed by the end of the next term to ensure further promotion.

A grade of I (Incomplete) is assigned if the work of a course is not completed because of illness or unavoidable absence and if, in the judgment of the instructor, the student has shown evidence that she can complete the course satisfactorily within a reasonable period of time.

An F (Failure) in *any* subject may necessitate withdrawal from the School unless the student's ability is exceptional in other respects, in which case repetition of the course may be recommended by the instructor, if the course is availa-

ble. With faculty approval a similar course may be taken at another university in the city, if not available at this School.

No more than one re-examination will be permitted in the case of failure in the midterm and/or final examination in a course, and only upon the recommendation of the instructor and approval by the Dean. In case a re-examination is permitted it is the responsibility of the student to arrange with the instructor for a plan of study preparatory to it. A charge of \$2 will be made for each re-examination. (No more than six re-examinations are permitted during the program.)

At the end of each term the student's progress is considered by a Promotion Committee. Her accomplishment in theory and practice, relationships with patients and others, and her general development are factors considered.

Those students demonstrating outstanding ability are elected to the Dean's List each term. Notation of this honor also appears on the student's final record. A student is eligible for honorable dismissal at any time she may elect to withdraw if her academic and personal record meet the standards of the school, and if she has no financial indebtedness to the school.

A student who is not maintaining an acceptable level in her work or who does not demonstrate that she has or is developing the qualifications which are important for a good nurse may be put on condition, suspended, or asked to withdraw. The School reserves the privilege of retaining only those students who, in the judgment of the faculty, satisfy the requirements of scholarship, health, and personal suitability for nursing.

Parents or guardians of students are advised when students are placed on condition or asked to leave the School. However, in general, the School reports only to students. Each student is kept informed of her progress through frequent examinations, reports, and conferences, and every effort is made to provide assistance and guidance which will help her to succeed. When it seems advisable, a student may be asked to withdraw from the program without having first been on condition.

DEGREE

The degree of Bachelor of Science in Nursing is granted by Cornell University. In order to qualify for the degree, the student must maintain a cumulative average of C for the total program, and must have completed satisfactorily all of the theory and clinical laboratory outlined in this Announcement or required by decision of the faculty.

In keeping with practice throughout the University, students in the School of Nursing may be granted the degree of Bachelor of Science in Nursing with Distinction, the only honorary designation granted by Cornell University. To qualify for this honor the student, in the judgment of the faculty, must have maintained her work at an exceptionally high level and must possess personal characteristics consistent with effective professional practice.

At the time of graduation one senior student is chosen by her classmates and, with the approval of the faculty, receives the award of "Excellence in Nursing." A small silver dish which accompanies this award is given by the Alumnae Association of the School of Nursing.

STATE REGISTRATION FOR GRADUATES

Graduates are eligible for admission to the examination for licensure administered by the Regents of the State of New York and are expected to take the first examination given after completion of the nursing course. Satisfactory completion of this examination classifies the graduate of the School as a Registered Nurse (R.N.) in the State of New York.

Graduates are urged to take State Board examinations in New York State immediately after graduating. It is not possible for the School to provide the varying kinds of data required by the many other states as expeditiously as required for early licensing. Those wishing to practice elsewhere may then apply for registration by reciprocity.

THE BASIC NURSING PROGRAM

OBJECTIVES

IN KEEPING with the philosophy underlying the program, the admission requirements and the curriculum have been planned to help each student attain the following objectives:

To be informed of resources through which she may seek information and keep abreast of new knowledge, particularly as it pertains to her professional practice; to develop beginning skill in using such resources.

To develop a concept of nursing as encompassing not only the care of the sick but the prevention of illness and the promotion of health for the individual and the community.

To become professionally competent and technically skilled, capable of drawing upon the humanities and the natural and social sciences to make reasoned judgments in the practice of her profession.

To gain appreciation of the place of nursing in today's society and to develop the ability to interpret it to others; to see her personal responsibilities as a member of the nursing profession.

To develop as a person who is sensitive to the needs of others and who can establish effective relationships and gain satisfaction and happiness from daily activities.

To grow toward becoming a mature individual as evidenced by self-motivation, self-direction, willingness to assume responsibility for her own actions, and the development of a set of values worthy of a professional person and a good citizen.

THE PROFESSIONAL CURRICULUM

(Three Academic Years)

Courses in the first year are primarily devoted to foundation materials from the natural and social sciences, and to the development of knowledge and basic skill related to the administration of general nursing care to hospitalized patients of all ages. The student gains a beginning understanding of the community organization and of resources and agencies which are commonly available to protect the health and well being of citizens. She gives nursing care for short periods each week under the guidance of a faculty member. In the spring of the year there is a four-week Intersession during which there is a concentrated period of daily practice in patient care on selected floors of The New York Hospital. Throughout the year there are observations in a variety of agencies and institutions in and near the city. Visiting lecturers present content from special fields, and assigned projects provide a focus for the detailed study of health problems.

The clinical portion of the program begins intensively in the second year, and most courses are made up of two related parts—one theory and the other practice. The practice, referred to as "clinical laboratory," usually occupies 20 hours a week. As graduates of the program are prepared to provide nursing care

in a variety of situations other than the hospital, there is emphasis throughout on disease prevention, health instruction, and rehabilitation. The student participates in conferences with practitioners from other professions, centering on the broad aspects of health care. She assists in the referral of patients who require nursing care after discharge from the hospital, and she has frequent contact with community agencies which are prepared to help provide such service.

During one term the student is particularly concerned with maternal-child health, including the care of new-born babies and their mothers, and consideration of family relationships and problems. In this term there is also an opportunity to observe well children in their normal activities and to give care to sick children who are receiving therapy in the out-patient clinics or on the floors of the hospital. Course content is presented by medical and nursing faculties in the Departments of Obstetrics and Pediatrics.

During the other term of the second year, the nursing needs of patients on medical and surgical services are explored. This course is presented through the combined efforts of the medical and nursing faculties in the Departments of Medicine and Surgery. Students care for selected patients both on the hospital floors and in the operating room, and they observe the progress of certain patients when they return for continuing care to the Out-Patient Department.

In the senior year a course is presented in psychiatric nursing by the faculties of the Payne Whitney Psychiatric Clinic. Through this course the student has an opportunity to gain an understanding of the causes of mental illness and to develop a beginning ability to meet the nursing needs of the mentally ill. She is introduced to the theories underlying prevention of such illness and becomes cognizant of the newer methods of treatment. There are visits to other types of agencies in the community, such as a state mental hospital.

Other courses in the third year include public health nursing, out-patient nursing, and nursing in long-term illness. Practice takes place in the Out-Patient Department of The New York Hospital, in a public health agency, and in centers which offer special rehabilitation programs for the chronically ill or handicapped.

Through the course "Professional Leadership in Nursing Care," senior students have an opportunity to learn some of the special skills of group leadership, to consider the ways of improving patient care through application of sound administrative and supervisory techniques and to get experience in directing the work of other nursing personnel. A few students who meet certain criteria may elect to participate in the "Seminar on Techniques of Scientific Investigation" under the guidance of a social scientist.

Absences During Program

Interruptions in attendance or inability to complete one or more courses at the time scheduled present a considerably greater problem in a program of this kind than in the usual academic course of study.

Because many courses involve clinical laboratory, a leave of absence usually necessitates an absence for one semester. As a result of absence, a student may be required to re-register for all or part of a course of study or she may be transferred to a later class.

PROGRAM ¹**First Year**

Courses in the first year are presented only once—in the semester indicated.

FALL SEMESTER			SPRING SEMESTER		
<i>Course No.</i>	<i>Course Title</i>	<i>Sem. Hrs. Cr.</i>	<i>Course No.</i>	<i>Course Title</i>	<i>Sem. Hrs. Cr.</i>
	Orientation	0	109	Body Changes in Disease	3.0
104	Anatomy-Histology	4.0	102	Fundamentals of Nursing II	6.0
106	Biochemistry-Physiology	4.0	110	Microbiology	3.0
101	Fundamentals of Nursing I	7.0	108	Nutrition and Diet Therapy	2.0
107	Human Development and Behavior	2.0	105	Social Science and Health I	1.0
TOTAL		17.0	TOTAL		15.0

Interession (Four Weeks)

<i>Course No.</i>	<i>Course Title</i>	<i>Sem. Hrs. Cr.</i>
103	Fundamentals of Nursing III	3.0

Second Year

Courses are presented each semester unless starred (*). Starred courses are presented but once a year, in the semester indicated.

FALL SEMESTER			SPRING SEMESTER		
<i>Course No.</i>	<i>Course Title</i>	<i>Sem. Hrs. Cr.</i>	<i>Course No.</i>	<i>Course Title</i>	<i>Sem. Hrs. Cr.</i>
151	*History and Trends in Professional Nursing I	1.0	152	*History and Trends in Professional Nursing II	1.0

TOTAL		13.0	TOTAL		12.0

TOTAL CREDITS (PROFESSIONAL PROGRAM): 94 SEMESTER HOURS.

² Third Year, Fall and Spring Semester, For Selected Students

Elective Course (Full Year)

Sem. Hrs. Cr.

206 Seminar in Techniques of Scientific Investigation 6.0

DESCRIPTION OF COURSES

NATURAL SCIENCES AND RELATED COURSES

104. ANATOMY-HISTOLOGY. A laboratory course in gross and histological anatomy, using human cadavers, a variety of tissue sections, and selected animal viscera. The regional approach is used.

Miss WRIGHT and Science Faculty.

Credit: 4.0 hours. (60 hours combined class and laboratory.)

106. BIOCHEMISTRY-PHYSIOLOGY. A study of the physiological systems, their interrelationships in maintaining the homeostatic adjustment of the body to environmental changes. Fundamental biochemical principles of metabolism, electrolytes, acid-base balance, blood and urine constituents are integrated.

Miss MILLER and Science Faculty.

Credit: 4.0 hours. (50 hours lecture and 25 hours laboratory.)

109. BODY CHANGES IN DISEASE. Structural and functional changes that occur in diseases, including their manifestations.

Miss MILLER and Science Faculty.

Credit: 3.0 hours. (45 hours lecture and demonstration.)

156. PRINCIPLES OF EPIDEMIOLOGY. A study of the principles of epidemiology and the application of the scientific method to the investigation of health problems in the com-

munity. Biostatistical principles and their application and use are included. Emphasis is placed on the role of the nurse in the epidemiologic investigation.

Faculty in Public Health Nursing; Guest Lecturers.

Credit: 1.0 hour. (15 hours class.)

110. MICROBIOLOGY. General and pathogenic bacteriology, and selected topics in parasitology and immunology form the basis. Also included are some public health aspects of sanitation and of selected diseases.

Miss WRIGHT and Science Faculty.

Credit: 3.0 hours. (42 hours class; 18 hours laboratory.)

108. NUTRITION AND DIET THERAPY. Normal adult nutrition. A study of the function and sources of the major food groups and their availability in the world. The needs of the individual and the many factors that influence nutrition are considered. Common diet modifications and their relationship to various diseases are studied. (Nutritional requirements in childhood and pregnancy are presented during the courses in pediatric and maternity nursing.)

Miss ERLANDER and Miss WHITTAKER.

Credit: 2 hours. (30 hours class.)

Knowledge of the basic sciences prepares the professional nursing student to make sound judgments when giving nursing care.

SOCIAL SCIENCES AND RELATED COURSES

151-152. HISTORY AND TRENDS IN PROFESSIONAL NURSING (I AND II). This course is presented in two units. The first will explore the historical backgrounds of nursing and parallel developments in religion, science, medicine, hospitals, and public health which have influenced nursing. The second unit will survey the development of, and modern trends in, American nursing as well as current problems of interest to the professional practitioner. Readings in primary and secondary sources.

Miss SCHWARTZ, Miss CASALINI; Guest Lecturers.
Credit: 2.0 hours. (30 hours class.)

107. HUMAN DEVELOPMENT AND BEHAVIOR. A survey of the life span of man designed to show, through fact and theory, the interdependence of the physical, emotional, and social behavior of man from conception to old age. It will present in general terms the characteristics and progress of the human being through successive age periods. It is intended to serve as a frame of reference for more intensive, specific learnings and experi-

ences in the clinical areas. The theme is the developing personality of biological man through the socialization process.

Miss FRANY, Faculty Associates, and Guest Lecturers.

Credit: 2.0 hours. (30 hours class.)

105-150. SOCIAL SCIENCE AND HEALTH (I AND II). Presented in two units, this course deals with the social, psychological, and cultural approach to problems of health and illness. Attention is focused upon concepts and methods of the social sciences that have particular relevance for total patient care.

Mrs. MACGREGOR and Guest Lecturers.

NURSING COURSES (GENERAL AND CLINICAL)

ORIENTATION. Students are introduced to the plan by which the program of the School will be presented. Among the topics are the facilities of the Medical Center and the relationships which exist between the various schools; the educational programs and services offered; the plan of dormitory living; and the student health maintenance program.

Faculty Members and Staff of the Medical Center.

Credit: 0. (15 hours class, approximately.)

202. DISASTER NURSING. Emphasis is upon the expanded role of the professional nurse during natural or man-made disaster; the knowledge and use of community resources for medical care, shelter, and rehabilitation. The role of the student within the Medical Center in an emergency or disaster situation is discussed. (First-aid techniques are taught as part of the course "Fundamentals of Nursing.")

Miss ELLISON.

Credit: 1.0 hour. (15 hours class.)

101-102-103. FUNDAMENTALS OF NURSING (I-II-III). This course extends throughout the whole first year and provides a foundation for all clinical nursing courses. In the first semester the student considers the basic needs of people in health and learns how these needs are met during illness. She gains a beginning understanding of the principles underlying diagnostic and therapeutic measures

and develops beginning skill in basic nursing activities. In the second semester opportunity is provided for developing deeper understanding and skill in the components of professional nursing; included is study of the community structure as it pertains to health and the relationship of this structure to nursing care. Throughout the first two terms there are increasing periods of laboratory experience on the patient units. During the four-week Inter-session in June, a concentrated laboratory experience is offered under faculty guidance on selected patient units in The New York Hospital.

Miss BERG and the Faculty of Fundamentals of Nursing.

Credit: 101. (1st semester) 7.0 hours. (75 hours class; 60 hours laboratory.)

102. (2d semester) 6.0 hours. (60 hours class; 150 hours laboratory.)

103. (Inter-session) 3.0 hours. (12 hours conference; 124 hours laboratory.)

201. PROFESSIONAL LEADERSHIP IN NURSING CARE. The senior student is guided in considering some of the special responsibilities of the professional nurse which occur in various types of practice. These include the improvement of patient care through group teaching and through the application of administrative and supervisory techniques. Provision is made for utilizing these

principles in working with both professional and auxiliary personnel.

Miss TRITT and Faculty from Clinical Departments.

Credit: 5.0 hours. (30 hours class; 224 hours clinical laboratory and related seminars.)

203. CHRONIC DISEASE AND REHABILITATION NURSING. Emphasis is on prevention, care, and rehabilitation in chronic illness; assessment of abilities and disabilities as they influence the definition of realistic goals for each patient. Consideration is given to the total effort of the rehabilitation team highlighting the contribution that nurses can make. Experience and observations in agencies and institutions offering services to the chronically ill and aged.

Mrs. HELFFERICH.

Credit: 3.0 hours. (25 hours class and 80 hours clinical laboratory and observations.)

MATERNAL-CHILD NURSING. During one semester the student focuses her attention on the family unit and considers the impact brought about by pregnancy or the illness of a child. Certain learning experiences are shared in the following courses, "Maternity Nursing" and "Pediatric Nursing":

154. MATERNITY NURSING. Maternity nursing provides opportunities to utilize theoretical knowledge through participation in selected learning experiences. An awareness of the family is gained through nursing care of mothers and babies, antepartally, intrapartally, and postpartally. Theory and clinical laboratory are concurrent.

Nursing and Medical Faculties of the Department of Obstetrics-Gynecology and Pediatrics and Nutrition Faculty.

Credit: 7.0 hours (67 hours class; 180 hours clinical laboratory.)

155. PEDIATRIC NURSING. Presentation of the principles and practice of nursing care of children, based on developmental patterns from birth through adolescence; biological, psychological, and cultural factors are considered as they influence child-parent-nurse relationships in nursing care and in treatment. Guided experiences in nursery school and on in-patient and out-patient units.

Nursing and Medical Faculties of the Pediatric Department and Nutrition Faculty.
Credit: 8.0 hours. (72 hours of class; 180 hours clinical laboratory.)

153. MEDICAL-SURGICAL NURSING. The student is guided in relating knowledge of disease processes to the mode of therapy and in developing ability to provide care in terms of individual needs. The various dimensions of

the nursing role in the recognition, prevention, and treatment of disease, health teaching, supportive care, and preparation for rehabilitation are considered. The student gains experience in the nursing care of patients with common medical and surgical diseases.

Nursing and Medical Faculties of the Departments of Medicine and Surgery and Nutrition Faculty.

Credit: 15.0 hours. (144 hours class; 360 hours clinical laboratory.)

204. NURSING CARE OF THE OUTPATIENT. Focus is upon the comprehensive care and supervision of the outpatient in a hospital setting. Emphasis is placed on the responsibility of the nurse as a member of the health team for helping the patient and family to cope with problems of illness and health maintenance through direct care, teaching, and counseling. The effective use of hospital and community resources is involved.

Nursing Faculty in the Outpatient Department.
Credit: 3.0 hours. (30 hours class; 64 hours clinical laboratory.)

200. PSYCHIATRIC NURSING. The study of behavior, emotional disorders, and the psychotherapeutic role of the nurse is designed to help the student further develop an understanding of self and of the importance of good interpersonal relationships, and an objective attitude toward psychiatric illness and an appreciation of its incidence in the community. Practice is obtained in a setting designed for intensive and progressive treatment where the role of the nurse and learning experiences have been identified. The student is assisted in utilizing a patient-centered and problem-solving approach based on principles of psychiatric nursing while participating in the care and treatment of individuals or groups of patients.

Nursing and Medical Faculties of the Payne Whitney Psychiatric Clinic.

Credit: 7.0 hours. (60 hours class; 180 hours clinical laboratory.)

205. PUBLIC HEALTH NURSING. The study of the basic principles which underlie public health activities and their application to public health nursing. Included in the lectures are principles of public health organization and administration, health education, environmental health, and statistics. Clinical experience is offered in one of three public health nursing agencies, the Visiting Nurse Service of New York, the Visiting Nurse Association of Brooklyn, or the Westchester County Department of Health. Guidance throughout the eight-week experience is provided by faculty who function in the clinical setting. Seminar

16 SCHOOL OF NURSING

discussions center on the student's experiences during each week, on current public health problems, and on programs and practices as they relate to the role of the public health nurse.

Faculty of the Department of Public Health Nursing, Guest Lecturers, Staff Members of the Public Health Agencies.

Credit: 6.0 hours. (46 hours class; 180 hours clinical laboratory.)

The professional nursing student is prepared to care for and teach patients in the community as well as in the hospital.

FACILITIES FOR INSTRUCTION

THE New York Hospital—Cornell Medical Center provides a setting in which there are opportunities of great value to students in the health fields. It includes laboratories and libraries with extensive holdings and offers an environment which promotes a spirit of inquiry. It encompasses services to patients reflecting modern concepts of care and newer knowledge of health and disease. Learning experiences in the Center are augmented by observations and practice in other community agencies.

LIBRARIES

In a newly completed building the Library of the School of Nursing shares facilities with the Medical College Library and provides resources for students and faculty of both schools and for the staff of The New York Hospital. The Library contains a wide selection of literature pertinent to all health fields and includes important nursing periodicals, both in current issues and in reference sets of bound volumes. There are additional small collections in each department near the nursing conference rooms on the Hospital floors. The Library is under the direction of a committee of the faculty and in the charge of professional librarians. In addition, the broad resources of the New York Public Library, the National Health Library, and many other special libraries in the city may be called upon whenever needed.

CLINICAL SERVICES

The clinical facilities of The New York Hospital provide unusual opportunity for the care and study of patients. The New York Hospital is comprised of five clinical departments, largely self-contained. Each of these is provided not only with facilities adequate in every way for the care of both in-patients and out-patients, but also with facilities for teaching and for the conduct of research. Many specialized clinical services are therefore available which are seldom found within a single organization. The Hospital has 1119 beds and 90 clinics. Annually approximately 33,000 patients are hospitalized and 58,000 treated as out-patients. The conduct of research in all clinical departments gives the student an opportunity to become increasingly aware of the part which the nurse must be prepared to play in research projects. Authenticity of the findings in many studies depends to no small degree on the accuracy with which the nurse carries out tests and procedures, observes and records reactions.

The Medical and Surgical Departments include, in addition to general medicine and general surgery, pavilions devoted to the specialties of neurology and metabolism, urology, ear, nose and throat disorders, plastic and neurosurgery, ophthalmology, and a fracture service. The Lying-in Hospital has a capacity of 199 adults and 107 newborns and provides for obstetric and gynecologic patients. Each year nearly 5000 babies are born in this Hospital. Since this Center was founded in 1932 over 100,000 babies have been born here.

The Department of Pediatrics includes 128 beds, with separate floors for the care of infants, older children, and premature babies. Facilities for the recreation

of convalescent children and the services of an occupational therapist offer opportunities for the nursing student to study the development and guidance of convalescent as well as sick children. All students have Nursery School experience. Here the student works with and observes the development of the well child and is thus better able to evaluate deviations in behavior which may accompany illness.

The Payne Whitney Clinic for psychiatric care has a bed capacity of 105 patients, admitted from all socio-economic groups and from all over the world. It is an intensive treatment center for psychotherapy, and its staff and resources are unusual. The student, therefore, has an opportunity to participate in the care of a variety of psychiatric illnesses of all degrees.

The Out-patient Department with its 90 clinics provides opportunity for the study of a large number of patients who come for general health supervision, for diagnosis of disease, and for treatment of disease that can be conducted on an ambulatory basis. Each year more than 220,000 patient visits are made to this Department. Students assist in diagnostic tests, in treatments, and in teaching patients self-care. Arrangements for continuity of care through use of referrals to public health nursing agencies are an essential part of all experiences. Opportunity is provided for participation in the teaching of expectant parents through special classes and individual conferences and for study of the family approach to health maintenance and care of children.

Public Health nursing field experience is provided in the Visiting Nurse Service of New York, the Visiting Nurse Association of Brooklyn, and, through the New York State Department of Health, with the Westchester County Department of Health. These agencies provide opportunity for the student to learn the application of public health principles in both voluntary and official agencies.

Representatives of various governmental, voluntary, and coordinating agencies plan with the faculty for appropriate ways to contribute to the student's knowledge of the community and of community organization for human services.

FACILITIES AVAILABLE TO STUDENTS

HEALTH SERVICE

GOOD health is of the utmost importance, and students have readily available a well-organized health service maintained in cooperation with the health service of the Center. Provision is also made for room care and for hospitalization.

Upon admission a physical examination by the School physician, a tuberculin test, and a chest X-ray are required. Subsequently, the student has either a chest X-ray or tuberculin test every six months, and a physical examination annually. Students receive dental health service consisting of a series of full-mouth X-rays, examination by a dentist, a written diagnosis with suggestions for treatment, and follow-up supervision. For dental repair, students are referred to their own dentists.

In the event of short-term, minor illnesses, students who are ambulatory may receive meals in their rooms in the Student Residence. Medical supervision is provided through the health service. If more seriously ill, students are cared for on the floors of The New York Hospital within the limits of the Hospital's policy on admissions and bed usage, and hospitalization up to the amount of eight weeks for any one admission is provided. Elective surgery and dental work are not included and, if not taken care of before admission to the School, must be arranged during vacations. Expenses for private nurses, transfusions, and personal items are borne by the student. The School reserves the right to collect all benefits from hospitalization insurance carried by the student as partial payment for care.

If, in the opinion of the School authorities, the condition of a student's physical or emotional health makes it unwise for her to remain in the School, she may be required to withdraw, either temporarily or permanently, at any time.

RESIDENCE FACILITIES

There is a Student Residence adjacent to the Hospital. Every effort has been made in the construction and equipment of the Residence to provide for the normal and healthy life of the student.

Comfortable lounges, reading, reception, and dining rooms are located on the first and ground floors. Students have attractively furnished single rooms with running water. Each floor has ample baths, showers, and toilet facilities, a laundry, and a common sitting room with adjoining kitchenette for informal gatherings.

RECREATIONAL FACILITIES

Believing that the education of young women today must include healthful social relationships, provisions for this development in the life of the student have been made.

A large auditorium is located on the first floor of the Residence. Sun roofs, pianos, television sets, record players, beach equipment, and an outdoor grill are available for the use of the students.

Students find fun and relaxation in a variety of social activities, such as in this singing group known as The Trebles.

A library of fiction and biography includes both current and standard works and many magazines of general interest. A branch of the Public Library and rental libraries are within a few blocks of the School.

Guest rooms are often available for friends and relatives at a reasonable charge.

The cultural opportunities of New York City are almost limitless in music, art, ballet, theatre, and libraries. Students enjoy the benefits of such opportunities as membership in the Metropolitan Opera Guild. Theatre tickets are often available through the Residence facilities.

To ensure the full benefit of proper use of these facilities, a Residence Director is in charge.

There are two religious clubs with voluntary memberships for both medical and nursing students, the Nurses' Christian Fellowship and the Newman Club. Guest speakers and planned forums provide an opportunity for exchange of thought on many subjects.

The Social Committee of Student Organization is responsible for a full and varied social calendar, which includes such activities as dances, skating parties,

coffee hours, and suppers. Through the Student's Athletic Association, plans are made for joining other schools of nursing in special sports events.

The students edit and publish a paper, "The Blue Plaidette," several times a year. Each class produces its own yearbook, known as "The Blue Plaid."

COUNSELING SERVICES

The School maintains active counseling services which are available to any student who needs assistance, either in connection with routine matters that may come up in her work in the School or in connection with special personal problems.

The Counselor of Students assists students in every way possible in their educational, personal, and social adjustment. She also cooperates with the faculty in helping the students in these areas and directs the students to those members of the staff who are best qualified to be of assistance in relation to the particular problem at hand.

The objective of the counseling program is to make it possible for any student to obtain such guidance as she may require in any phase of her life while in the School of Nursing.

GENERAL INFORMATION

SCHOOL GOVERNMENT

ONE RULE governs the conduct of students in the School of Nursing: "A student is expected to show both within and without the School, unfailing respect for order, morality, personal honor, and the rights of others." Through the Student Organization, students take responsibility for living according to this rule, which is construed as applicable at all times, in all places, to all students. The Student Organization sets up its own Executive Council, Judicial Council, and standing committees. A Faculty Committee on Student Affairs acts in an advisory capacity to the Student Organization and, with the Student Organization, sponsors student-faculty meetings which provide for informal discussions of school activities and problems.

UNIFORMS

The blue plaid chambray uniform of the School is worn by the student for all clinical assignments related to the educational program. A laboratory coat is worn over street clothes if the student returns to any floor of the Hospital for study outside her regular practice assignment. For the public health nursing assignment, each student is required to provide herself with a tailored navy or black coat, hat or beret appropriate to the season, black or navy low-heeled walking shoes, preferably oxfords, and tailored conservative rainwear. Other items of uniform for hospital and public health assignments are listed in the section "Tuition, Fees, and Expenses." If employed in the Department of Nursing Service the student wears a white uniform designed especially for that activity.

DRIVER'S LICENSE

The student may be required to drive a car and to possess a driver's license by the time she reaches the period of public health field experience. It is suggested that this requirement be met before admission or no later than the vacation period of the first year in the program.

MARRIAGE

It is important that students planning marriage read and understand fully the section on absences, p. 10.

When a student is contemplating marriage, it is desirable, though not required, that she discuss her proposed plans well in advance with the Counselor or the Associate Dean. Immediately after marriage, the student is required to inform the School and to provide her husband's name; this should be done in a letter addressed to the Dean.

A married student may elect to live either in the Residence or outside, but it is essential that she confer with the Counselor before making final arrangements for living outside. It is also her responsibility to submit to the Registrar a

written notation of her outside address and telephone number before she moves from the Residence, and at any time that her address is changed. If she lives outside, a room may be retained in the Residence, if available, by payment of the current rental fee.

TUITION, FEES, AND EXPENSES

(Amounts are subject to change. Dates of billing are approximate.)

Application Fee	\$10.00
Acceptance and Graduation Fee	\$25.00*

	FIRST YEAR			SECOND YEAR		THIRD YEAR		Grand Total
	Registration			Registration		Registration		
	Day	February	June	Day	February	Day	February	
	September	1st	1st	September	1st	September	1st

Expenses (incl. School Uniform)+	108.65	20.00	50.00	40.65	20.65	33.65	43.65	317.25
TOTAL	\$375.50	\$276.85	\$90.00	\$299.50	\$273.50	\$286.50	\$285.50	\$1887.35

* The deposit of \$25.00 made at the time the student accepts an appointment to the in-coming class is credited as the Graduation Fee, applicable in the last term of the program. This fee is not refundable if the student withdraws before admission or does not complete the program.

Refunds: In the case of withdrawal, refund will be based on a deduction of 10% per week on all charges, as of the first day of each term. No refund will be made after the mid-point of each term.

† Those students who wish to be employed in the Center in an auxiliary capacity will be required to buy several uniforms for that purpose. These are suitable for wear after graduation.

Special Fees: For late registration or late payment of fees, each \$5.00; for change of schedule due to re-admission or reinstatement, \$10.00; special or repeated examination, \$2.00; specially scheduled class or tutoring by a faculty member, \$4.00 per hour. In exceptional circumstances a special fee may be waived by the Dean.

(See the sections "Living Expenses" and "Opportunities for Employment.")

TUITION, FEES, AND EXPENSES

THE TABLE on the facing page shows a general outline of the cost of the educational program of the School of Nursing.

LIVING EXPENSES

Students are responsible for meeting the cost of board and room throughout the program. Laundering of uniforms is available without charge, and automatic washers are provided for personal laundry. Billing for rooms is on a term basis. It is estimated that the weekly cost of meals is \$18 if purchased in one of the cafeterias of the Center and these are paid for as purchased. There are small kitchenettes on each floor of the Residence where breakfasts and light lunches may be prepared.

During the Christmas and spring vacations students may leave their possessions in their rooms but may not use their rooms without permission of the Residence Director. Possessions must be removed during the summer vacation unless the student is working in the Center for at least a four-week period. In the latter instance there is a charge of \$5 per week while the room is in use. (Limited storage space is available for personal possessions.)

OPPORTUNITIES FOR EMPLOYMENT

Students should be prepared to meet all expenses for the first term, as the opportunities and the time for earning are limited. However, after the first term there are a number of work opportunities open to students who may wish to earn a portion of their expenses. Several types of jobs are available, but most are as Assistants in the Department of Nursing Service. Applications for that type of employment should be submitted three weeks before the beginning of each term and three weeks before each vacation period if employment during vacation is desired.

It is estimated that approximately half of the cost of room and board can be met after the first term through a schedule of such employment totaling eight hours per week.

Summer employment in the Center provides an opportunity to earn toward meeting the expenses of the program and also offers certain valuable work experience. A student who chooses to work full time for eight weeks can earn \$500-\$600 exclusive of living expenses, each summer. In all instances the health and academic standing of the student are considered when assisting her to plan her earning activities. Loans are also available.

FINANCIAL ASSISTANCE ADMINISTERED BY THE SCHOOL

Scholarships administered by the School are available to students in need of financial assistance. Awards are open both to students entering the School of

Nursing and those already in the School. Factors taken into consideration, in addition to financial need, are the student's all-around record as indicated by academic work, participation in school and community activities, and qualities indicating promise of growth and potential contribution to nursing.

Students taking their first two years of academic work at Cornell in Ithaca may obtain additional information on scholarships by writing to Office of Scholarships and Financial Aid, Cornell University, Ithaca, New York.

Applications for financial assistance through the School of Nursing are made at the time of application for admission to the School, and awards are made known in April before admission. For students already in School, application is made four weeks before the beginning of each term.

FUND OF THE COMMITTEE FOR SCHOLARSHIPS . . . Established and maintained by a committee of women interested in the School of Nursing, to assist girls who otherwise would not be able to prepare for nursing. The greatest number of awards are made possible by this Fund.

JULIETTE E. BLOHME SCHOLARSHIP FUND . . . Established as an endowed fund by Dr. and Mrs. George H. Van Emburgh as a memorial to Juliette E. Blohme of the Class of 1922 through a gift of \$6000, the interest on which may be used in whole or in part each year.

VIVIAN B. ALLEN SCHOLARSHIP FUND . . . Established as an endowed fund by gifts from the Vivian B. Allen Foundation, Inc., income from which is used to provide scholarship aid annually for one or more students in need of financial assistance.

NORTH COUNTRY COMMUNITY ASSOCIATION SCHOLARSHIP . . . Given by the North Country Community Association, Glen Head, New York, for an entering student residing in Nassau, Suffolk, or Queens County, New York. Amount, \$600.

EMMAJEAN STEEL FULLER FUND . . . This Fund, begun by the Class of 1952 in memory of Emmajeane Steel Fuller, a former member of the Class, is available for an occasional scholarship.

SAMUEL J. MORITZ SCHOLARSHIP FUND . . . Established in 1960 as a memorial to Samuel J. Moritz, and made possible by a gift from Edward Moritz and LeRoy Moses, executors of his estate. The income provides scholarship aid annually to one or more students in need of financial assistance.

CORNELL WOMEN'S CLUB OF NEW YORK . . . Effective for the fall of 1964, a scholarship amounting to \$300 will be made available to the School for the ensuing year.

THE SWITZER FOUNDATION . . . Effective in the fall of 1962, the amount of \$1000 was made available to the School annually. This gift is intended to assist any student who is an American citizen living within 50 miles of New York City and who has financial need.

ALLSTATE FOUNDATION GRANT . . . Beginning in the fall of 1962 a grant totaling \$750 per year was made to the School of Nursing to assist a student throughout the program.

STUDENT LOAN FUND . . . Loans are available to students who have been in the School at least one term. Applications are made to the Committee on Financial Aid. Although applications are accepted at any time during the year on an emergency basis, students are expected to plan for a term at a time and to make requests four weeks before the beginning of each term.

FINANCIAL ASSISTANCE ADMINISTERED BY OUTSIDE SOURCES

New York State Regents Scholarships, Grants and Loans

The following scholarships are available for residents of New York State. The applicant should apply through her high school principal while she is still a student in high school.

For more information on any of these, write to the State Education Department, University of the State of New York, Albany, New York, requesting the leaflet "Opening the Door to College Study through New York State Regents Scholarship Examinations for High School Seniors."

REGENTS SCHOLARSHIPS FOR BASIC PROFESSIONAL EDUCATION IN NURSING . . . Amount, \$200-\$500 a year depending upon financial need, for a maximum of three years. Applicable only to period in the School of Nursing.

REGENTS COLLEGE SCHOLARSHIPS . . . Amount, \$250-\$700 a year depending upon financial need for a maximum of four years. Applicable to first two years of college and to period in the School of Nursing.

REGENTS SCHOLARSHIPS IN CORNELL . . . A tuition-reducing scholarship ranging in amount from \$100 to \$1000 a year depending upon financial need for a maximum of five years. Applicable to first two years of college and to period in the School of Nursing.

REGENTS SCHOLARSHIPS FOR CHILDREN OF DECEASED OR DISABLED VETERANS . . . Amount, \$450 a year for four years. Applicable to first two years of college and to period in the School of Nursing.

NEW YORK HIGHER EDUCATION ASSISTANCE CORPORATION sponsors a program through which students may obtain loans from local savings banks.

SCHOLAR INCENTIVE PROGRAM . . . Grants of \$100-\$300 yearly, depending on need and tuition paid, with minimum yearly grant of \$100. For those students who demonstrate a capacity to pursue a degree and plan to attend college, and those who are presently in college and maintain satisfactory academic performance.

Armed Services

ARMY AND NAVY NURSE CORPS STUDENT PROGRAMS . . . Students in the Basic Nursing Program may apply for appointments in the Army Student Nurse Program at the beginning of the junior year, or the Navy Nurse Corps

Candidate Program at the beginning of the senior year. The appointments carry generous financial allowance. A student who participates twelve months or less serves on active duty in the respective service for 24 months. If two years of support has been given, the student serves 36 months.

PUBLIC HEALTH NURSING, NEW YORK STATE DEPARTMENT OF HEALTH SCHOLARSHIP PROGRAM FOR SENIOR STUDENTS IN BACCALAUREATE BASIC PROGRAMS OF NURSING . . . The scholarship will be in the form of a tax-free stipend paid directly to the student bi-weekly during full-time study in the senior year of the program in nursing. The candidate, if approved, must sign an agreement to work full-time in an upstate New York (exclusive of New York City) official public health unit for at least one year, beginning within one month following graduation. Applications are available at the School of Nursing.

REQUEST FOR INFORMATION OR APPLICATION

It is desirable that prospective applicants enroll with the School as early as possible so that they may receive assistance in planning their programs in high school and college to gain the best possible background preparatory to entering the School of Nursing.

To receive information, fill out and return the following:

Miss Muriel R. Carbery, Dean
Cornell University-New York Hospital School of Nursing
1320 York Avenue, New York, New York 10021

Please place my name on your mailing list so that I may receive information which will help me in planning my high school and college preparation for nursing school entrance.

Name Date
Address
Date of Birth
High School: name and location
Date diploma received or expected
College: name and location
Date on which I expect to have completed at least two years of college19.....
(If you are in college) Please send me an application blank

FORM OF BEQUEST

Gifts or bequests to the School of Nursing may be made either to the Hospital or to the University with a request that they be used for the School of Nursing, as follows:

"I give and bequeath to The Society of the New York Hospital (or I give and bequeath to Cornell University) the sum of \$..... for the Cornell University-New York Hospital School of Nursing."

If it is desired that a gift to the School of Nursing shall be made in whole or in part for any specific purpose in the program of the School, such use may be specified.
